Available for remote work, ready for business trips

Desired position and salary

Lead Product Designer / Head of UX/UI

Specializations:

- Product manager
- Product analyst
- Development team leader

Employment type: full time

Work format: remote

Desired travel time to work: any

Work experience — 9 years 9 months

February 2024 —
March 2026
2 years 2 months

Ediweb

Head of Design (International Products)

Key achievements:

Built an international design system for multiple products, reducing time-to-market for new features by 30% and simplifying handoff to development.

Managed teams of 2 to 5 designers (including outsourced), implemented hiring processes, mentoring, and design reviews.

Adapted the UI kit for White label, enabling 5+ client instances per quarter.

Conducted 10+ interviews and participated in building the design team, including terminations when necessary.

Processes:

Managed the design direction of international products. Shaped processes, strategy, and the team.

Team and process management: supervised two designers on the project, distributed tasks, conducted design reviews, ensured quality and consistency. Participated in hiring and onboarding new employees.

Strategic planning: responsible for the design strategy of the international direction, contributed to the product roadmap, feature prioritisation, and sprint planning.

Design system as an asset: developed and evolved a universal international UI kit used across several products. This unified interfaces, accelerated feature delivery, and simplified handoff to development.

End-to-end product management: independently led the DocsBird project from planning to MVP launch on a testing stand. Responsibilities included timeline management, scenario design, hypothesis testing, and presenting the product to stakeholders.

▢ Case: neolissa.github.io/polina-tsoy-designer/docsbird.html

Cross-team collaboration: worked with a distributed team (analysts, developers, PMs) in an Agile environment, participated in sprint planning, set and tracked tasks in Jira, defended design decisions.

Strategic analysis: conducted competitive research, proposed and elaborated ideas for new features, shaped the design vision for product development.

Ruxsoft

Lead Product Designer

Led client projects and internal products as the lead designer in a team of two designers. Managed processes, mentoring, and design workflows.

Team leadership: acted as lead designer in a two-person team, distributed tasks, conducted design reviews, ensured quality and consistency.

Mentoring and development: mentored junior designers — helped them onboard, shared experience, conducted reviews, fostered professional growth. Participated in interviews and hiring new designers.

End-to-end product design: led projects from research and analysis to interface design and handoff to development. Conducted product research (corridor, qualitative and quantitative), built CJMs, User Flows, and contributed to product roadmaps.

Design systems and scaling: created and systematised style and component libraries. Adapted the UI kit for White label — this enabled product commercialisation and fast launch of new client instances.

Processes and communication: established efficient collaboration with development — optimised mockup handoff, participated in sprint planning, controlled implementation quality through design reviews and testing.

Key projects:

Coaching app (Wakeup Warrior) — product evolution and design system.

▢ app.wakeupwarrior.com

Medical system (Medica+) — designing complex scenarios for doctors and patients.

Personal account with financial reporting (Relax.coin) — working with large volumes of data, including mobile version.

Authored a case study on UX/UI optimisation:

TVIP

UX/UI Designer (Lead Designer for the domain)

Sole designer for the IP/TV product. Full responsibility for the design direction: from research to implementation.

Domain leadership as the only designer: independently designed interfaces for IP/TV products — internal admin panel, desktop and mobile app versions. Full cycle: logic, navigation, visual style,

prototyping.

Strategic product development: conducted market analysis, proposed new features based on trends and user needs, contributed to product vision.

Collaboration with development: closely worked with the dev team, supervised design implementation, reviewed the finished product against mockups, participated in testing.

Visual content: created vector illustrations and selected graphics to ensure both aesthetics and functionality.

Work examples:

□ Mobile app: apps.rustore.ru/app/ru.tvipmedia.tv

□ Promo site: promo.tvipmedia.ru

Tizbi

Bryansk

IT, System Integration, Internet

- Internet Company (Search Engines, Payment Systems, Social Networks, Information and Educational, Entertainment Resources, Website Promotion etc.)
- Software Development

UX/UI Designer

Sole designer on the project. Full responsibility for web and mobile interface design.

Independent project delivery: websites, forums, landing pages (in English), iOS and Android mobile apps.

Developed guidelines to ensure a unified style.

Created interactive prototypes in Figma and static mockups in Photoshop.

Used Motion Design to visualise complex data.

Fenice Group

Designer (marketing process management)

Managed marketing processes, coordinated a designer, analytics, and strategy.

Process management: supervised a designer, coordinated visual communication tasks, ensured brand consistency.

Strategic marketing: wrote articles, developed marketing plans, prepared monthly and weekly reports on channel effectiveness.

Analytics and optimisation: analysed audiences via Google Analytics and click maps, used data to optimise website user experience.

Full e-commerce cycle: redesigned the website, including migrating a 1C catalogue to the site. Set up ad campaigns on Google and Yandex.

Cross-functionality: worked with 1C Document Flow and Trade Management — understood client business processes and how data flows to the website.
