Senior / Lead Product Designer | English C1 | 10+ years

Cover Letter: Lead Product Designer

Assemble Remote · Anywhere in the World 20 July 2026

Dear Hiring Team,

Assemble needs its first full-time Product Designer to own the web app end to end, set the quality bar, and build the design system from the ground up. That is the seat I want: high ambiguity, close partnership with product and engineering, and durable craft.

I am a Senior Product Designer with 10+ years in product and 6+ years fully remote. English C1. Portfolio: <https://neolissa.github.io/polina-tsoy-designer/en/>

- **DocsBird (0 → 1 ownership)**, independently led planning to MVP: scenarios, UI, hypothesis testing — launch in 4 countries, registration 7 → 3 steps, +45% conversion.
- **WakeupWarrior (design system backbone)**, built the system that unlocked speed and White Label — -90% styles, ×3 development speed, constructor covering ~80% of UI.
- **Complex productivity-style UX**, designed multi-platform and admin workflows for technical operators (TVIP) and data-dense B2B surfaces — structure under ambiguity.

I am comfortable being the design backbone of a small team: discovery, flows, polished UI, prototyping, and a living design system that helps engineering ship. Based in Argentina (ART UTC-3), available remote anywhere.

Happy to walk through DocsBird and WakeupWarrior as proof of 0 → 1 ownership plus systems craft.
