## Cover Letter: Lead Product Designer, Marketplace

Circle Remote worldwide 20 July 2026

Dear Hiring Team,

Discover is a two-sided problem: creators need visibility and trust; members need signal through noise. I am applying for Lead Product Designer, Marketplace because I enjoy exactly this tension — multi-audience flows where trust and clarity decide conversion.

Senior Product Designer, 10+ years, remote 6+ years, English C1. Portfolio: <https://neolissa.github.io/polina-tsoy-designer/en/>

- **TVIP (two surfaces)**, admin + consumer across 5 platforms — personas, themes, coherent system.
- **DocsBird (trust + conversion)**, international B2B onboarding clarity — registration 7 → 3, +45% conversion.
- **Systems that scale discovery UX**, WUW reusable components/tokens so patterns stay consistent as surfaces grow.

Honest stretch: marketplace ranking at consumer scale is newer for me than B2B/admin+consumer products. I transfer multi-audience IA, trust UX, and AI-assisted prototyping speed. Comp ask \$75–90K geo-adjusted.

Happy to discuss Discover tradeoffs and show relevant multi-audience cases.
