Senior Product Designer | English C1 | 10+ years

Cover Letter: Staff UI/UX Product Designer

Hospitable Remote · USA/EMEA timezones 20 July 2026

Dear Hiring Team,

Hospitable builds software so short-term rentals can run themselves — and the Staff Product Designer mandate is to destroy complexity as an art form. That is how I already work: multi-persona systems, consistent design languages, and interfaces operators can trust under pressure.

I am a Senior Product Designer with 10+ years in product and 6+ years fully remote across time zones. English C1. Portfolio: <https://neolissa.github.io/polina-tsoy-designer/en/>

- **TVIP (multi-platform systems)**, designed admin + consumer surfaces across 5 platforms with 4 personas and day/night themes — power-user workflows, not marketing pages.
- **WakeupWarrior (design language)**, led an evolutionary design system: tokens, components, constructor covering ~80% of UI — ~90% styles, ×3 delivery speed.
- **Relaunch (platform clarity)**, unified a fragmented internal ecosystem into one habit loop — ×4 session time, +40% engagement, 100% adoption.

I partner closely with product and engineering, defend craft without slowing shipping, and work async with overlap for Europe and Americas East Coast. Based in Argentina (ART UTC-3).

Happy to share portfolio cases that map to complexity reduction and design-language leadership.
