Cover Letter: Lead Product Designer (Crypto Exchange)

Hyphen Connect / Client Remote · Anywhere 13 July 2026

Dear Hiring Team,

I am interested in the Lead Product Designer role for your decentralised exchange client. High-trust trading UX needs the same foundations I have shipped before: a coherent design language system, pixel-disciplined multi-platform UI, and research that keeps complexity usable.

Lead/Senior Product Designer, 10+ years, design systems specialist, English C1, worldwide remote. Portfolio: <https://neolissa.github.io/polina-tsoy-designer/en/>

- **Design Language System at scale**, WUW: 35 reusable components + tokens; constructor covering ~80% of UI; ~90% styles; ×3 speed; White Label opened.
- **Cross-platform systems**, TVIP: UI kit and coherent experience across 5 platforms with personas and themes.
- **Fintech-adjacent complexity**, Financial reporting accounts and international B2B launches (Relaunch, DocsBird) where clarity and trust matter.

I am comfortable with crypto as a domain. Please share the client company name and compensation band when possible — I apply carefully and prefer a direct line to the product team once screening clears.

Available fully remote worldwide. Happy to present a design-system case and a multi-platform walkthrough.

Portfolio: WUW / TVIP / DocsBird <https://neolissa.github.io/polina-tsoy-designer/en/>
