Senior Product Designer | English C1 | 10+ years

Cover Letter: Senior UX/UI Designer

Nortal Remote · Latin America 20 July 2026

Dear Hiring Team,

Nortal's LATAM remote team needs designers who can turn complex digital experiences into clear, polished products for global audiences — partnering with studio, product, and engineering without losing craft. That is how I already work.

I am a Senior Product Designer with 10+ years in product and 6+ years fully remote. English C1. Portfolio: <https://neolissa.github.io/polina-tsoy-designer/en/>

- **WakeupWarrior (systems + craft)**, led an evolutionary design system — tokens, components, constructor covering ~80% of UI — ~90% styles, ×3 delivery speed.
- **DocsBird (end-to-end delivery)**, owned flows from research to production UI — 4-country launch, registration 7 → 3 steps, +45% conversion.
- **TVIP (multi-device)**, designed admin + consumer surfaces across 5 platforms with personas and day/night themes.

I present design rationale to leadership, collaborate closely with developers on fit-and-finish, and help evolve design systems that keep large sites coherent. Based in Argentina; available 100% remote LATAM with USD compensation.

Happy to share portfolio cases that map to large-scale web craft and systems thinking.
