Senior Product Designer | English C1 | 10+ years

Cover Letter: Staff Product Designer, Pay Ecosystem

Remote · Remote · Anywhere · 13 July 2026

Dear Hiring Team,

Paying people correctly across borders is a high-stakes UX problem: dense data, trust, and edge cases that break naive flows. I am applying for Staff Product Designer, Pay Ecosystem because my strongest work is exactly this class of product — financial reporting UIs, international B2B launches, and systems that keep teams shipping.

Senior/Staff Product Designer with measurable ownership on complex platforms. English C1. Fully remote for 6+ years. Portfolio: <https://neolissa.github.io/polina-tsoy-designer/en/>

- **Financial / employee money surfaces**, On Relaunch (Relax.coin) I designed a data-heavy personal account and ecosystem that reached ×4 session time and 100% adoption.
- **International trust & conversion**, DocsBird: 4-country launch under constraints; registration 7 → 3 steps; +45% conversion.
- **Systems leverage**, WUW design system: −90% styles, ×3 speed, White Label — the kind of leverage a pay ecosystem needs to stay consistent.

I would focus on making payroll and pay journeys legible for customers under ambiguity: progressive disclosure for dense data, reusable patterns in the design system, and research loops that catch failure modes before they hit support.

Open to Staff-scope ownership as an IC. Fully remote worldwide; short notice period. Glad to share deep dives on the financial and international cases.
