Senior Product Designer | English C1 | 10+ years

Cover Letter: Senior Product Designer — Sena

Rwazi Global Remote 13 July 2026

Dear Rwazi Hiring Team,

Sena sits at the hard part of product design: turning dense, multi-dimensional consumer intelligence into something enterprise users can trust and act on. I am applying because that is the work I do best — data-heavy B2B interfaces, research, and systems that scale.

Senior Product Designer, 10+ years, English C1, fully remote 6+ years. Portfolio: <https://neolissa.github.io/polina-tsoy-designer/en/>

- **Dense data** → **clarity**, Financial reporting and admin-scale products (Relaunch, Medica+, TVIP admin) where hierarchy and progressive disclosure matter.
- **Adoption metrics**, Relaunch: ×4 session time, +40% engagement, 100% adoption after unifying fragmented tools.
- **0 → 1 under constraints**, DocsBird international launch with +45% conversion after simplifying critical flows.

Honest note on AI-assisted build: I am fluent in Figma and HTML/CSS and already partner tightly with engineering; I am actively building daily muscle with AI coding tools rather than claiming years of Claude Code production history. I learn tools fast when they are core to how the team ships.

Excited about a small senior design team with direct product/eng collaboration. Available worldwide remote.
