Senior Product Designer | English C1 | 10+ years

Cover Letter: Product Designer, AI-Native Products

Synthesia · Remote · Europe (soft geo) · 20 July 2026

Dear Hiring Team,

Synthesia is shaping AI-native creation experiences — where interaction design must make powerful models feel simple and trustworthy. I am applying for the AI-Native Product Designer role to bring senior end-to-end craft to that problem space.

Senior Product Designer, 10+ years, English C1, fully remote 6+ years. Portfolio: <https://neolissa.github.io/polina-tsoy-designer/en/>

- **Ambiguity** → **shipped**, DocsBird 0 → 1 under unclear mandate — 4-country launch, +45% conversion.
- **Systems for evolving products**, WUW design system — -90% styles, ×3 speed as the product surface grew.
- **Complex multi-surface UX**, TVIP across 5 platforms with coherent personas and themes.

Note: I previously applied to Product Designer, Growth at Synthesia — this AI-Native track is a different problem space I want specifically. Based in Argentina; can overlap EU hours. Comp ask \$75K USD.

Happy to share AI-tooling practice and relevant case studies.
