Overflow Remote 20 July 2026

Dear Hiring Team,

Overflow is building giving infrastructure for high-impact organizations — trust, clarity, and multi-rail payments (cash, stock, crypto). I am applying as Senior Product Designer because my strongest work is high-stakes, multi-step UX where craft and systems keep complexity usable.

Senior Product Designer, 10+ years, English C1, remote 6+ years. Based in Argentina. Portfolio:
<https://neolissa.github.io/polina-tsoy-designer/en/>

- **Trust & conversion**, DocsBird international onboarding — 7 → 3 steps, +45% conversion.
- **Fintech-adjacent money surfaces**, Relaunch personal account / ecosystem — ×4 session time, 100% adoption.
- **Systems**, WUW reusable system — −90% styles, ×3 speed.

Comfortable with crypto rails as a domain. Comp ask \$75K USD. If the role is US-work-auth hard-locked, please say so early — I am Argentina-based remote.

Happy to walk through trust/fintech-adjacent cases.
