Senior Product Designer | English C1 | 10+ years

Cover Letter: Product Designer

Umbrel Remote 21 July 2026

Dear Hiring Team,

Umbrel is building personal server experiences that need craft, clarity, and delight — umbrelOS, first-party apps, and the website. I am applying as Product Designer because that is how I work: high craft in Figma, willingness to throw away weak ideas, and shipping with engineering.

Senior Product Designer, 10+ years, English C1, remote 6+ years. Based in Argentina. Portfolio:
<https://neolissa.github.io/polina-tsoy-designer/en/>

- **Craft + multi-surface**, TVIP across 5 platforms — personas, day/night themes, coherent UI kit.
- **Systems that speed polish**, WUW design system — -90% styles, ×3 delivery, White Label unlocked.
- **Clarity under complexity**, DocsBird onboarding — 7 → 3 steps, +45% conversion.

I obsess over details and micro-interactions, collaborate openly with engineers, and know when to ship. Comp ask \$75K USD.

Happy to walk through craft-heavy cases and discuss umbrelOS design challenges.
